Andrea Liliana Ramírez Silva

Full Stack Software Engineer

Bogotá, Colombia · +57 313 822 3912 · anlramirezs11@gmail.com · linkedin.com/in/grumysh · github.com/grumysh · gitlab.com/grumysh · grumysh.github.io/WebPage

PROFESSIONAL SUMMARY

Systems Engineer with 8+ years of experience designing, building, and deploying full stack web applications in high-impact environments — from financial platforms in banking to Web3 products with 150,000+ users. Led as Tech Lead the architecture and delivery of Chrysalis Quest, a platform funded with USD 85,000, deployed on AWS with Docker, CI/CD, and microservices. Expert in Node.js, TypeScript, React, and AWS, with a current focus on AI agent automation and AI-assisted development with Claude Code and GitHub Copilot.

TECHNICAL SKILLS

Backend: Node.js, Express, NestJS, TypeScript, Python, REST APIs, microservices, serverless architecture

Frontend: React, Redux, Next.js, Angular, Vue.js, Nuxt.js, Vite, JavaScript ES6+, HTML5, CSS3, Tailwind CSS

Databases: MongoDB, PostgreSQL, MariaDB, Redis, SQL, data modeling, open data integration

Cloud & DevOps: AWS (EC2, ECS, ECR, S3, Lambda, Secrets Manager, CloudWatch), Docker, DigitalOcean, MongoDB Atlas, CI/CD (GitHub Actions, GitLab CI)

Testing & Quality: Jest, Jasmine, Karma, unit testing, integration testing, TDD

Security: JWT, OAuth 2.0, authentication/authorization, role-based access control (RBAC)

AI & Automation: Claude Code, GitHub Copilot, Gemini, OCR (Tesseract.js), process automation

Web3: thirdweb, smart contracts, Polygon, OpenSea SDK, Binance API

Practices: Software architecture, SOLID, design patterns, clean architecture, Scrum, Jira, Git

PROFESSIONAL EXPERIENCE

Tech Lead **Apr. 2024 – Present**

Ashara Studios · Remote

- Led the architecture and development of Chrysalis Quest, a missions and rewards platform funded with USD 85,000 by The Sandbox DAO: designed the data model, Web3 integration with signed transactions, and deployment on AWS (EC2, S3, ECR, ECS) with Docker and CI/CD.
- Joined the backend team of New Festival Town, a game-as-a-service with ~150,000 players on MiniPay; deployed the backend infrastructure and database.
- Architected and built the initial version of the studio platform (Node.js/Express, MongoDB, React/Redux, NFTs on Polygon, CI/CD on GitLab), contributing to scaling from 8th to 2nd place in The Sandbox Builder Challenge.
- Automated mission validation with OCR (Tesseract.js), processing hundreds of images daily with ~90% accuracy and reducing manual review by ~70%.
- Built with Claude Code a full stack admin portal (Node.js, TypeScript, MongoDB, AWS ECS) with corporate authentication and RBAC for ~20 employees, automating 5+ internal processes.

Web Developer & Level Designer **Jul. 2022 – Apr. 2024**

Ashara Studios · Bogotá

- Developed the Tower of Myths website (the largest game on The Sandbox by map size) using React.js and thirdweb; the game surpassed 1,100 players with peaks of ~100 daily.
- Built a serverless JavaScript API (DigitalOcean) that served dynamic content from Notion to the website, reducing content update times from days to minutes.

Software Engineer & Co-founder **May. 2021 – Jun. 2022**

Chrysalis Guild · Remote

- Co-founded and led operations of a blockchain community with ~300 players, a team of 17 people (5 direct reports), and token assets valued at ~USD 1 million.
- Rebuilt in Python the token payment distribution system integrated with the Binance API, ensuring timely payments to 300+ players and team members monthly.
- Developed an automated trading bot (Node.js, Express) connected to the Binance API with technical analysis indicators, and web features with Vue.js and Nuxt.js.

Junior Edge Developer **May. 2020 – Feb. 2021**

Banco de Occidente · Bogotá

- Developed with Angular 8 and TypeScript web interfaces for 3+ financial products of the bank, integrated with REST services and internal APIs.
- Implemented unit tests with Jasmine and Karma achieving +80% code coverage; participated in release cycles with Scrum, Jira, and Git.

Software Engineer **May. 2019 – Feb. 2020**

Universidad Distrital Francisco José de Caldas · Bogotá

- Developed internal contract management applications on a microservices architecture on AWS: post-contractual amendments frontend (5 types with multi-contract support) and Supplier Evaluation client, using Angular 8.
- Integrated 4+ web clients with backend microservices via REST APIs, working with Scrum and GitHub.

Software Engineer **Aug. 2018 – Feb. 2019**

XueColombia Ltda. · Bogotá

- Developed civic technology platforms on open government data (JavaScript, SQL on MariaDB) for Burócratas, processing thousands of public records.
- Alerta a la Obra (winner, Anti-Corruption Hackathon 2018): designed the database in MariaDB integrating SECOP II contracts with weekly updates from datos.gov.co and implemented the frontend.

Web Development Lead & Co-founder **Apr. 2017 – Jul. 2018**

Ashara Studios · Bogotá

- Co-founded the company (~20 people) and led the software area: defined the tech stack, architecture, and databases for each project.
- Developed ~10 websites and web applications for clients and internal projects using Angular, React, and JavaScript.

Prior Experience **2013 – 2016**

- Freelance development of an HR management system (Java, PostgreSQL) and the website and case management application for a law firm (Node.js, Sails.js, PostgreSQL).

EDUCATION

B.Sc. in Systems Engineering — Universidad Distrital Francisco José de Caldas, Bogotá

LANGUAGES

Spanish: Native · English: B1 (Intermediate)

AWARDS

- Winning team at the Hurify Challenge at AngelHack Bogotá 2018
- Winning team at the Anti-Corruption Hackathon 2018 — Alerta a la Obra project
- Top 6 in Bogotá and Top 8 nationally at the National Innovation Cup 2017
